
LEVEL 2 COURSE

APPLYING METHODS

Applying Methods explores a variety of methods used in implementing P2/ engagement and considers how to design and integrate those methods into the P2/engagement process.

You will learn:

- Identify a range of methods which can be used for various P2/engagement purposes and processes, and strategies to select the most appropriate method/s for an P2/engagement project/process
- Research, design and test an in person and/or online method using a range of tools and resources
- Apply the 4 steps of designing a method incorporating the 8 key components of method design
- Explore a variety of both F2F and online methods/techniques that are more structured process and have nested methods within them
- Analyze the specific requirements for online and digital methods and identify and select appropriate platforms and tools to meet needs
- Test your method design by submitting to peer review using a checklist
- Apply methods to achieve P2/engagement goals and objectives including using effective communication skills, and test for appropriate sequencing

BRAVELYLEAD.COM

- Offered online in 4 virtual workshops of 4 hours each
- Offered in person on request
